CARE AND USE

- **To reduce risk of radio interference caused by head-phone-, earphone- or microphone cable, only use adequate accessories with cable length less than 3 m.**
- **To avoid product damage, do not store this unit in humid or dusty areas.**
- **Keep objects that are sensitive to magnetic fields (such as bank cards) away from this unit. Such items may lose data or stop working.**
- **Do not attempt to disassemble this unit. Disassembly may result in high-voltage electrical shock.**
- **Do not peel off the covering on batteries and do not use if its covering has been peeled off.**
- **Align the poles (+) and (-) correctly when inserting the batteries.**
- **Avoid placing this unit in trunks of cars. Exposure to intense heat may cause the batteries to leak or explode.**
- **Mishaping of batteries can cause electrolyte leakage which can damage items the fluid contacts and may cause a fire. If electrolyte leaks from the batteries, consult your dealer.**

Texto 2

MENINGITIS

Meningitis, an inflammation of the membranes that cover the brain, is sometimes caused by bacteria , at other times by viruses. It is contagious but only to a certain extent. Actually, it is**.....(a).....** rather than contagious. In other words, it can be transmitted by intimate contact with the afflicted individual. When two people in a family contract the condition at the same time, the infection has probably originated from the same source.

Contrary to common belief, meningitis is curable in the**.....(b).....** of cases;**.....(c).....**, though most patients make a complete recovery a small number may suffer permanent aftereffects such as**.....(d).....** of sight or hearing, or a weakness of one of the limbs.

(Adapted from **"Graded English 3"**)
